

VETERINARY REPORT

HUGH HOOFNA, 2019 bay standardbred colt
Brands: 199711
Agent: Breckon Farms Ltd

Wednesday, 27 January 2021

The aforementioned colt was re-examined at Breckon Farms on Monday, 25 January 2021 by Dr Noel Power for the purpose of obtained follow-up radiographs of the right hock. The joint was treated for an infection of the right tarsocrural (hock) joint in July 2020.

The radiographs showed that the right hock joint appears to be in good condition and no bony changes were noted.

I am satisfied with the response to treatment and he should continue to make a full recovery therefore be considered a normal risk for purchase and soundness in reference to the right hock.

This report does not constitute a full appraisal of the horse for sale and is limited to an opinion and response to treatment relating to the right hock radiographs only.
