VETERINARY REPORT

WILD WILLOW 2019 bay colt
Brand - 199720
Owner/Agent: Breckon Farms

Tuesday, 9 February 2021

The aforementioned colt was admitted to Waikato Equine Veterinary Centre on Tuesday, 2 June 2020 for treatment of osteochondral changes of both hocks as detected on screening radiography for investigations of joint swellings. In order to maximise any future racing potential it was advised to surgically explore both joints and treat any lesions as appropriate. Medium sized osteochondral fragments were removed from each joint. The colt had an uneventful recovery and no complications were noted during the post operative period.

Radiographs were obtained on Tuesday, 2 February 2021 and showed good healing at the previous surgical sites. I am satisfied that the response to surgery has been good and the horse should go on to make a full recovery and should be considered a normal risk for racing.

This report does not constitute a full appraisal of the horse for sale and is limited to an opinion of the treatment and follow up appraisal of the hock radiographs only.
