Horse Willyahavtime (Donthavtime – Rock N Roll Heaven 19C)
Owner Havtime Breeding
Lot 324

11/2/21

Att Murray Little

The above named horse was seen by myself on 18 February 2021. Skin lesions over the body had recently appeared. In my opinion these lesions are consistent with ringworm. Please note that diagnostics were not done due to time constraints and the clinical appearance of the disease. The horse was treated with anti-fungal medicine.

It is advised that hand sanitiser is used before touching other horses after this horse is handled.
