Owner: H. Kaplan

Lot: 338

Horse: Stubing 190786, Standardbred colt

The above named horse was seen by Rangiora Vet Centre on the 27th March 2020, with the presenting complaint of a small laceration to the caudal aspect of the left front fetlock area. On inspection the wound was only skin deep.

The horse was sedated, the wound sterilely cleaned and local anesthetic injected. The wound was then stitched closed, and bandaged.

The colt was to be box rested until sutures removed two weeks following the initial visit.

The wound was then bandaged until the wound had fully healed.

The wound is aesthetic in nature, and negligible risk for future athletic performance.

This is to certify that the above named horse was seen by Rangiora Vet Centre during the date mentioned above.

Yours faithfully,

Sam Burrows BVSc BAgSc
Equine Veterinarian
