SURGICAL REPORT

Re: Linda Grace – Bettor's Delight 2020 colt
Brand: 202787
Microchip: 985100012184405
Owner: Woodlands Stud

On 30 September 2021 the above-described yearling underwent general anaesthesia for placement of a right carpal medial transphyseal screw in the distal radial physis for treatment of right carpal valgus. Following screw placement, the skin incision was closed routinely. The yearling recovered without incident.

Management/follow-up:

1. Rest: please maintain the colt on small yard rest until the distal limb is straight.
2. Suture removal: 11 October 2021.
3. Bandage changes: please change the bandages every four days for four bandage changes.

Intravenous injections have been administered to this colt. Please monitor the catheter, injection sites, and incisions closely. Please contact Auckland Veterinary Centre if there are any signs of heat, pain, swelling and/or discharge.
